# CLARIANA AI AUTOMATION: SERVICE CATALOG 2026

Transforming Fragmented Tasks into Autonomous Ecosystems

## 1. Intelligent Data Pipelines & Architecture

---

Real-time synchronization of CRMs, ERPs, and internal databases to create a single source of truth.

**Key Benefit:** Eliminate 100% of manual data entry and copy-paste errors.

**Core Feature:** Automated data cleaning and validation across all systems.

## 2. Autonomous Task-Handling Agents

---

AI agents that reason, execute, and report across multiple tools without supervision.

**Key Benefit:** Reclaim 40+ hours per week through delegation to AI.

**Core Feature:** Tool-aware agents operating across email, calendar, and PM tools.

## 3. Conversational AI & Knowledge-Base Chatbots

---

Context-aware chatbots trained on your internal knowledge and documentation.

**Key Benefit:** Reduce support tickets by up to 70%.

**Core Feature:** Multimodal chat supporting text, image, and voice inputs.

## 4. Predictive Analytics & Business Intelligence

---

Machine learning models that forecast churn, growth, and operational risks.

**Key Benefit:** Data-driven decisions powered by predictive insight.

**Core Feature:** Custom real-time dashboards in Clariana teal.

## 5. Strategic AI Roadmapping & Consulting

---

High-ROI AI strategy aligned to your business objectives.

**Key Benefit:** No experimentation without direction.

**Core Feature:** Tooling audits, phased delivery, and team enablement.

## 6. Custom AI Automation Architecture

---

Purpose-built automation ecosystems using Make, Zapier, and n8n.

**Key Benefit:** Software adapts to your operations.

**Core Feature:** Enterprise-grade, self-hosted automation where required.

## 7. Autonomous Lead Engines

---

AI-powered lead capture, qualification, and booking systems.

**Key Benefit:** Instant engagement with every prospect.

**Core Feature:** Real-time CRM updates for sales teams.
